Provincial Outreach Program for Autism and Related Disorders

POPARD super-workshop

Understanding Challenging Behaviour

This workshop will help participants develop a basic understanding about behaviour and the underlying causes of challenging behaviour. In addition, some common strategies for preventing and managing challenging behaviour will be discussed.

Example learning outcomes include:

- Define behaviour and challenging behaviour, and develop operational definitions of behaviour.
- Label and describe the ABCs (of challenging behaviour) and identify examples of them.
- Identify the different functions that behaviours serve, and explain why it is important to determine the function prior to intervention.
- Use ABC data collection to determine the function of behaviour.
- Define replacement behaviours and describe how to select one to teach.
- Discriminate between punishment and extinction, and explain the pitfalls of using punishment procedures.
- Explain why it is important to collect data.

.....

Confirmation

Thank you Donri for registering for the *Understanding Challenging Behaviour super-workshop (SD27 Cariboo-Chilcotin - February, 2018 session)*.

A copy of your confirmation will be emailed to the email address provided. Please also check your junk/spam mailbox.
